

Instructions

In this assignment, you are going to use an online relational algebra calculator (<http://138.232.66.66/ra/calc.htm>) that allows you to enter a relational algebra query expression or a SQL query and see the result. We have preloaded sample data. All you need to do is to type your relational algebra expressions and check the results. Here's how to use the site.

1. Open a Web browser and visit <http://138.232.66.66/ra/calc.htm>.

The screenshot shows the web interface of the online relational algebra calculator. At the top, there is a dropdown menu set to 'UIBK - R, S, T' and two tabs: 'Relational Algebra' and 'SQL'. The main content area is titled 'load a Dataset'. On the left, under 'Miscellaneous', there is a list of datasets: 'Kemper Datenbanksysteme', 'UIBK - KursDB', 'UIBK - R, S, T', 'Database Systems The Complete Book - Exercise 2.4.1', 'Database Systems The Complete Book - Exercise 2.4.3', and 'Wikipedia - Relational algebra (en)'. Below this, under 'University of Innsbruck', there are two more datasets: 'PS Datenbanksysteme WS2014/15, Blatt 4' and 'UIBK - PS Database Systems - Exercise Sheet 5 (Pizza)'. On the right, there is a section titled 'Load dataset stored in a gist' with a text input field labeled 'gist ID' and a blue 'load' button. Below this, there is a section titled 'Create your own Dataset' with a link to 'Maintainer Tutorial' and two buttons: 'create new Dataset' and 'modify current Dataset'.

2. Click the “UIBK - R,S,T” button. In the “gist ID” box, type **50c050f1bd1b9d2afa33f39710d62a53** and click the “Load” button. All the data are loaded on the browser side, which means you will have to reload every time you refresh or reopen this page.

This screenshot shows the same web interface as the previous one, but with the 'gist ID' input field now containing the value '50c050f1bd1b9d2afa33f39710d62a53'. The 'load' button is still present and ready to be clicked. The rest of the interface, including the dataset list and the 'Create your own Dataset' section, remains the same.

3. You should see the “Success” message. Now the UCA relations have loaded into your browser. You can execute a relational algebra expression by typing one in the right pane.

Success: gist loaded successfully

UCA

Airplane
registration_number
string
model_number string
purchased_year
number

Relational Algebra

SQL

π σ ρ \leftarrow τ γ \wedge \vee \neg $=$ \neq \geq

1 your query goes here ...

keyboard shortcuts:
execute statement:
execute selection:

4. In the following example, we use the projection (π) operator, the “IATA_code” field, and the relation “**Airport**”. After typing this relational algebra expression, click “> Execute query” and you will see the result along with a tree representation of the query.

Relational Algebra

SQL

select from where group having order limit

1 your query goes here ...

keyboard shortcuts:

execute statement:

[CTRL]+[RETURN]

execute selection:

[CTRL]+[SHIFT]+[RETURN]

autocomplete:

[CTRL]+[SPACE]

6. For more details on syntax, click the “Help” button or visit <http://138.232.66.66/ra/help.htm>.

Homework 3 requires you to write queries on the relations using relational algebra. Show the results of each query. We recommend that you write your relational algebra expressions first before trying to execute them on the site. Please note that you will not get any points for showing the result if the relational algebra expression is not correct (!). Since you have a “live” algebra interpreter at your disposal, however, this should not be an issue – you can test all of your queries this way.
